As **MERN (MongoDB, Express.js, React.js, Node.js)** developer, I have gained extensive experience in building and deploying full- stack web applications. With a strong foundation in **JavaScript ES6** and web development, I specialize in creating efficient and scalable applications using the MERN stack. I bring a comprehensive skill set and a passion for delivering high-quality web applications. Throughout my career, I have utilized industry-standard tools like Git for version control and collaborated with teams using agile methodologies for efficient project management.

Technical Projects

HomeLand
- **E-commerce** website for House/Apartments sale/purchase/rentals **(MERN Stack).**
- Front-end designed using **TailwindCss** and **Ant Design** components.
- Utilized **React-Redux** for state managements and data flow.
- **Formik** Library for form validation.
- Back-end designed using **Node, Express and MongoDB.**
